

CEO MESSAGE

Dear Stakeholders,

It is with great pleasure that I introduce Lithium Ionic's inaugural 2023 ESG Scorecard. Following our public listing on the TSX Venture Exchange in May 2022, we have made substantial strides in our ESG programming, integrating sustainable business practices into our governance foundation and corporate ethos. Specializing in the development of lithium, a critical element necessary in the global energy transition, we prioritize ethical development in alignment with the highest international standards. Lithium Ionic is responsibly advancing its projects with the goal of not only becoming Brazil's next lithium producer, but also a significant contributor to the global lithium supply chain.

The past year marked significant milestones for our ESG programming. In 2023, we prioritized transparency by aligning our reporting with international ESG standards and industry best practices. This ESG Scorecard, developed in collaboration with ONYEN, will provide us and our stakeholders with insights into our sustainability efforts, establishing benchmarks that we can use to set ESG goals and targets as our project progresses. Explore this report for insights into our achievements and the steps we're taking to grow our sustainability and ESG initiatives.

Your interest is sincerely appreciated, and we welcome your feedback. Special thanks to our on-site and corporate teams for their work in upholding sustainable practices and contributing to the success of Lithium Ionic in 2023.

A handwritten signature in black ink, appearing to read 'B. Hylands', with a stylized flourish at the end.

BLAKE HYLANDS

CEO, DIRECTOR
