

CANALASK PROJECT YUKON, CANADA

Nickel / Copper Sulphide

- Historic MRE: 400,000 tonnes @ 1.35% nickel
- Magmatic Norilsk style “feeder”
- Epigenetic “footwall” deposit - similar to Sudbury Igneous Complex
- 100% owned

TYKO PROJECT ONTARIO, CANADA

Nickel / Copper Sulphide

- High tenor Massive Sulphides, >10% nickel
- New Nickel District
- Excellent road access
- Close to smelters in Sudbury, ON
- 100% owned

LK PROJECT FINLAND

Palladium / Copper / Nickel

- Disseminated high-tenor sulphide
- Multiple untested targets along 38 km mineralized strike length
- Close to copper and nickel smelters

INDICATED

(38.2Mt @ 0.89 g/t TPM, 0.13% Cu, 0.11% Ni, 65 g/t Cobalt)

- 1.1 million oz precious metals
- 111 million lbs copper
- 92 million lbs nickel
- 5 million lbs cobalt

INFERRED

(49.7Mt @ 0.68 g/t TPM, 0.16% Cu, 0.14% Ni, 74 g/t Cobalt)

- 1.1 million oz precious metals
- 173 million lbs copper
- 152 million lbs nickel
- 8 million lbs cobalt
