

Community Programs, Objectives and Achievements

The Company has on-going programs in the local communities in which it operates.

The impact of Covid-19 has created unique opportunities for the Company to support local communities and institutions. In 2021 the Company organized and sponsored food donations to local religious institutions, organized and financed free dental clinics, and donated Personal Protective Equipment to local schools and clinics. Unigold also donated materials for the upgrading and construction efforts of local sports fields, donated sports equipment to teams and leagues, donated food to first responders to support their efforts in the frontier area, upgraded roads and assisted in the reconstruction of bridges and river crossings. In conjunction with communities the company constructed ponds to support the development of local fish farms and supported over 800 elementary and middle school students with annual donations of knapsacks, notebooks and school supplies.

This support was provided in addition to our on-going programs of re-forestation and reclamation of work areas and support for local government tree and plant nurseries.

The Company also actively assists and supports local government organizations in their projects in the communities by providing free labor and machinery where required.

Within its workforce, the Company promotes a culture of community engagement and involvement and encourages all of our employees to make suggestions for community improvements and to donate their time to community causes.
